UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF CALIFORNIA

HUAWEI TECHNOLOGIES, CO, LTD, et
al.,

 Plaintiffs,

 v.

SAMSUNG ELECTRONICS CO, LTD., et
al.,

 Defendants.

Case No. [3:16-cv-02787-WHO](#)

**ORDER GRANTING SAMSUNG'S
MOTION FOR ANTISUIT
INJUNCTION**

Re: Dkt. Nos. 234, 235, 240, 244, 277, 278

INTRODUCTION

Defendants/counterclaim-plaintiffs Samsung Electronics Co., Ltd., Samsung Electronics America, Inc., and Samsung Research America, Inc. (collectively, “Samsung”) seek to enjoin plaintiffs Huawei Technologies Co., Ltd., Huawei Device USA, Inc. and Huawei Technologies USA, Inc. (collectively, “Huawei”) from enforcing injunction orders issued by the Intermediate People’s Court of Shenzhen (“Shenzhen Court”). The Shenzhen Court orders found that Samsung is infringing two of Huawei’s Chinese standard essential patents (“SEPs”), and enjoined Samsung’s Chinese affiliates from manufacturing and selling its 4G LTE standardized smartphones in China. As a prerequisite to granting this relief, the Shenzhen Court considered whether the parties had complied with their obligations to license their SEPs on fair, reasonable, and nondiscriminatory (“FRAND”) terms. Both parties have asserted breach of contract claims in this action based on the other’s alleged failure to license their SEPs on FRAND terms.

Under the framework established in *E. & J. Gallo Winery v. Andina Licores S.A.*, 446 F.3d 984 (9th Cir. 2006), Samsung has demonstrated that it is entitled to an antisuit injunction preventing Huawei from enforcing the injunction orders issued by the Shenzhen Court. Those orders could render meaningless the proceedings here, and the risk of harm to Samsung’s

United States District Court
Northern District of California

1 operations in China in the interim is great. Its motion is GRANTED.

2 BACKGROUND¹

3 I. FACTUAL BACKGROUND

4 A. The Parties

5 Huawei and Samsung are major players in the world of wireless telecommunications—a
6 world governed by cellular technology standards, such as the 3G UMTS and 4G LTE standards
7 developed by the Third Generation Partnership Project (“3GPP”) and promulgated by standard
8 setting organizations like the European Telecommunications Standards Institute (“ETSI”).² Both
9 Huawei and Samsung have agreed to license their declared standard essential patents (“SEPs”) on
10 fair, reasonable, and non-discriminatory (“FRAND”) terms and conditions under ETSI’s
11 Intellectual Property Rights (“IPR”) Policy. Compl. ¶ 63 (Dkt. No. 1[redacted], Dkt. No. 3-
12 4[under seal]); *see also* Samsung’s Answer and Am. Counterclaims ¶ 29 (“Samsung admits that
13 ETSI members who are subject to a commitment to offer licenses on FRAND terms and
14 conditions are obligated not to refuse to enter a license for declared, essential patents that is fair,
15 reasonable, and non-discriminatory.”)(Dkt. No. 91[redacted]; Dkt. No. 90-2[under seal]); *id.* ¶ 54
16 (“Samsung admits that SEC has submitted IPR licensing declaration forms to ETSI expressing
17 SEC’s [Samsung Electronics Co., Ltd.] preparedness to grant licenses on FRAND terms and
18 conditions for certain patents as set forth in those declarations in accordance with the ETSI IPR
19 Policy.”); Samsung’s Licensing Declarations (Samsung’s Answer and Am. Counterclaims, Exs.
20 14, 23–26, 29, 34; Dkt. Nos. 91-14, -18, -23-26, -29, -34); Huawei’s Licensing Declaration
21 (Huawei’s Compl., Exs. 2.1–2.43, Dkt. Nos. 3-1–13[under seal]).

22
23
24 ¹ Portions of the background are redacted in accordance with the administrative motions submitted
by both parties. Those motions are addressed at the end of this order.

25 ² Standard Setting Organizations “establish technical specifications to ensure that products from
26 different manufacturers are compatible with each other.” *Microsoft Corp. v. Motorola, Inc.*, 696
27 F.3d 872, 875 (9th Cir. 2012)(“Microsoft II”)(citing Mark A. Lemley, *Intellectual Property Rights
and Standard-Setting Organizations*, 90 Calif. L.Rev. 1889 (2002)). Many courts have
28 expounded on the benefits of standards in various industries. *See, e.g., Microsoft Corp. v.
Motorola, Inc.*, 795 F.3d 1024, 1030 (9th Cir. 2015)(“Microsoft IV”); *Apple, Inc. v. Motorola
Mobility, Inc.*, 2011 WL 7324582, at *1 (W.D. Wis. June 7, 2011).

1 **B. Samsung’s Manufacturing Operations in China**

2 Samsung’s Chinese manufacturing hubs have a production capacity of [REDACTED]
 3 [REDACTED], the second largest worldwide. T. Wang Decl. ¶ 5 (Dkt. No. 240-48[under seal]). In
 4 2015 and 2016, Samsung manufactured [REDACTED] in China, of which [REDACTED]
 5 [REDACTED] were imported to the United States. *Id.* ¶¶ 6, 7. In the same years,
 6 Samsung sold [REDACTED] units of LTE devices in China for a total revenue of [REDACTED]
 7 [REDACTED]. *Id.* ¶ 7.

8 **C. Negotiation History**

9 In 2011, the parties began discussing a cross-license for their respective patent portfolios,
 10 but they disagreed on the scope of those licenses. *E.g.*, 3/2/15 Letter from Huawei to Samsung re”
 11 Patent Licensing Negotiation (Stake Decl. ¶ 19, Ex. 19, Dkt. No. 234-10[under seal]). I will not
 12 recount the history of their failure to reach agreement in the ensuing years, since all of the
 13 information has been filed under seal, except to wonder aloud how it can be in the interest of these
 14 important multi-national corporations to slog through unending litigation around the globe rather
 15 than figure out a process to resolve their differences if agreement is impossible.

16 **II. PROCEDURAL HISTORY**

17 Huawei filed this action on May 24, 2016, asserting infringement of 11 of its SEPs, and
 18 alleging that Samsung breached “its commitment to enter into a SEP cross-license with [Huawei]
 19 on FRAND terms and conditions.” Compl. ¶¶ 1, 4. Huawei also asks the court to set the terms
 20 and conditions for a global FRAND cross license under the parties’ respective worldwide
 21 portfolios of essential 3G and 4G patents, and to enjoin Samsung from “seeking injunctive relief
 22 against Huawei (including affiliates) in any jurisdiction with respect to any alleged infringement
 23 of any patent essential to 3GPP standards.”³ Compl. at Prayer for Relief, E. Samsung answered
 24 and filed counterclaims, including patent infringement claims for its own declared essential SEPs,
 25 declarations of non-infringement and invalidity of Huawei’s patents, and claims for antitrust

26 _____
 27 ³ Huawei points out that it has not sought preliminary injunctive relief attempting to halt any of the
 28 seven remaining actions brought by Samsung in China, which seek injunctive relief against
 Huawei based on its alleged infringement of Samsung’s SEPs. Opp’n at 8.

1 violation in violation of section 2 of the Sherman Act,⁴ and breach of contract. Answer and Am.
2 Counterclaims at 47–114.

3 The next day,⁵ Huawei filed 11 separate actions in China, ten of which it filed in the
4 Intermediate People’s Court of Shenzhen (“Shenzhen Court”) where Huawei is based. Xie Decl. ¶
5 3 (Dkt. No. 235-2). Eight of the actions involve 3G and 4G SEPs, including direct counterparts to
6 patents-in-suit. *Id.* Each action seeks a determination on whether the SEP is infringed, and if so,
7 whether an injunction should issue.⁶ *Id.* Samsung countered with fourteen of its own actions in
8 China, alleging Huawei is infringing Samsung’s SEPs and seeking injunctive relief. Wang Decl.
9 ¶¶ 2–8; Xie Decl. ¶ 2 n.1. Seven of those SEP actions remain pending.⁷ *See* Xie Decl. ¶ 2 n.1.

10 The Chinese actions have proceeded quicker than this one. *See* Wang Decl. ¶ 9 (describing
11 status of the various actions). In particular, the Shenzhen court has held trials on two of Huawei’s
12 SEPs and two of Samsung’s SEPs. Wang Decl. ¶¶ 9, 10. The trials addressed both FRAND
13 issues and technical issues specific to each SEP. *Id.* ¶ 9. During these trials, the parties had full
14 opportunities to present their evidence and argument. *Id.* ¶ 11; *see also id.* ¶¶ 12–19 (explaining
15 the proceedings before the Shenzhen court that form the basis for this motion).

16 _____
17 ⁴ As part of this claim, “Samsung seeks an order enjoining Huawei from pursuing injunctive relief
18 for infringement of patents, including those asserted here and in the parallel Chinese actions, that
19 Huawei contends are essential to ETSI and 3GPP standards.” Am. Counterclaims ¶ 322.

20 ⁵ Huawei indicates that it filed the Chinese actions “simultaneously,” and that those actions reflect
21 a different date due to the time difference between here and China. And it highlights Samsung’s
22 acknowledgement that the actions were “simultaneous[ly]” filed. *See* Samsung’s Answer and Am.
23 Counterclaims ¶ 340 (“Yet simultaneous with its filing of this action, Huawei filed eight actions
24 against Samsung in China based on Huawei’s declared essential patents, seeking only injunctions
25 as relief for Samsung’s alleged infringement...”); *id.* ¶ 543 (“Around the same time as Huawei
26 filed its Complaint here, Huawei initiated several patent infringement actions in China, seeking to
27 enjoin Samsung from making, using, selling, or importing products that practice 3GPP
28 standards.”).

29 ⁶ Huawei has also initiated a rate-setting and royalty payment suit in China. Wang Decl. ¶ 2; Xie
30 Decl. ¶ 22.

31 ⁷ The parties filed a total of 42 infringement actions in China, one corresponding to each patent,
32 both SEP and non-SEP. Wang Decl. ¶ 5. In parallel with those proceeding, all 42 patents
33 underwent invalidation procedures at the Patent Reexamination Board (“PRB”). *Id.* ¶ 6. Once a
34 patent is invalidated by the PRB, it must be withdrawn or dismissed. *Id.* ¶ 7. Twenty-two
35 infringement suits remain between the parties—12 involving Huawei’s SEPs and 7 involving
36 Samsung’s SEPs. *Id.* ¶ 8.

1 On January 11, 2018, the Shenzhen Court issued orders finding that Samsung is infringing
 2 two of Huawei’s Chinese SEPs and enjoining Samsung’s Chinese affiliates from manufacturing
 3 and selling its 4G LTE standardized smartphones in China.⁸ Xie Decl. ¶ 7; Jan. 11, 2018
 4 Shenzhen Court Civil Judgment, certified translation (“Shenzhen Order”)(Stake Decl. ¶ 37, *id.*,
 5 Ex. 36, Dkt. No. 277-5[under seal]).⁹ The Chinese patents are direct counterparts to two of
 6 Huawei’s asserted patents, U.S. Patent Nos. 8,369,278 and 8,885,587. Xie Decl. ¶ 4. The
 7 Shenzhen Court evaluated the evidence and found that “Huawei’s behaviors had complied with
 8 FRAND principles while Samsung’s behaviors had not complied with FRAND principles.”
 9 Shenzhen Order at 205. The Shenzhen Court decided that Huawei’s six presuit offers to Samsung
 10 “were made within the reasonable range according to the strength of SEPs owned by Huawei” and
 11 that Huawei’s offers “had complied with FRAND principles.” *See* Shenzhen Order at 200–203.
 12 As to Samsung, the court found that its initial insistence on “binding SEP licensing and non-SEP
 13 licensing ... violated FRAND principles for SEP licensing negotiations” and contributed to
 14 “serious[] delay[]” in the negotiations. Shenzhen Order at 180. It also found that “Samsung had
 15 made significant mistakes during technical negotiations,” which “seriously delayed the
 16 negotiations and clearly violated FRAND principles... directly leading to more than six years of
 17 negotiations between both parties without any progress.” *Id.* at 185. It concluded that Samsung’s
 18 sole SEP licensing offer “did not comply with FRAND principles.” *Id.* at 204.

19 Samsung filed a notice of appeal on January 26, 2018. Xie Decl. ¶ 8. It filed this motion
 20 on February 1, 2018. Mot. to Enjoin Huawei from Enforcing the Injunction Issued by the
 21 Intermediate People’s Court of Shezhen (“Mot.”)(Dkt. No. 278-2[redacted]; Dkt. No. 278-1[under
 22 seal]). It claims that if its appeal is unsuccessful, it will have to close its factories in China,
 23

24 ⁸ The Shenzhen court ordered a further continuation of the trial on Samsung’s two SEPs, and
 25 presumably heard that additional evidence on February 27–28, 2018. Wang Decl. ¶ 9. The parties
 are awaiting decisions in those two suits. *Id.*

26 ⁹ Huawei noted that Samsung submitted only the order in case number 840, but actually seeks to
 27 enjoin orders issued in both case numbers 840 and 816. Wang Decl. ¶ 12 n.1. It indicated that
 28 “[t]he FRAND issues contemplated, evidence and expert opinion presented, and Court’s decision
 were substantively the same in both the 840 and 816 cases.” *Id.* It also represented that it accepts
 the accuracy of the certified translation “[f]or purposes of this motion only[.]” Opp’n at 6 n.2.

1 affecting [REDACTED], be forced into a negotiation at a disadvantage or be
2 compelled into a global adjudication of all FRAND issues with Huawei, which it stoutly resists.

3 Since the initial case management conference, Huawei has urged the court to bifurcate the
4 issues and address the breach of contract and related FRAND issues first, which would likely
5 moot the patent infringement claims. *See* Joint Case Management Conference St. at 2–5 (Dkt. No.
6 67); Minute Entry for Initial CMC held on 9/13/16 (Dkt. No. 75); Huawei’s Br. ISO its Request to
7 Bifurcate (Dkt. No. 84). Samsung has insisted that bifurcation was not the most efficient course
8 because the FRAND licensing obligation cannot be determined without “assessing whether and to
9 what extent [the patents-in-suit] are valid, infringed, enforceable, and essential to the relevant
10 ETSI standard.” Samsung’s Opp’n to Bifurcation at 2 (Dkt. No. 85). I denied Huawei’s request to
11 bifurcate, and issued a case management order setting a schedule for the parties to narrow the
12 issues in preparation for a two-week trial. Order Regarding Case Management Proposals (Dkt.
13 No. 143).

14 LEGAL STANDARD

15 “A federal district court with jurisdiction over the parties has the power to enjoin them
16 from proceeding with an action in the courts of a foreign country, although the power should be
17 ‘used sparingly.’” *Seattle Totems Hockey Club, Inc. v. Nat’l Hockey League*, 652 F.2d 852, 855
18 (9th Cir. 1981). “Such injunctions allow the court to restrain a party subject to its jurisdiction
19 from proceeding in a foreign court in circumstances that are unjust.” *E. & J. Gallo Winery v.*
20 *Andina Licores S.A.*, 446 F.3d 984, 989 (9th Cir. 2006)(“*Gallo*”). The Ninth Circuit employs “a
21 three-part inquiry for assessing the propriety of such an injunction.” *Microsoft Corp. v. Motorola,*
22 *Inc.*, 696 F.3d 872, 881 (9th Cir. 2012)(“*Microsoft IP*”); *see also Gallo*, 446 F.3d at 990
23 (establishing framework for determining whether to issue anti-suit injunction).

24 First, we determine whether or not the parties and the issues are the
25 same in both the domestic and foreign actions, and whether or not
26 the first action is dispositive of the action to be enjoined. Second,
27 we determine whether at least one of the so-called *Unterweser*
28 factors applies. Finally, we assess whether the injunction’s impact
on comity is tolerable.

Microsoft II, 696 F.3d at 881 (citations and internal quotation marks omitted); *see id.* at 882

1 (referring to three-part inquiry as the “*Gallo* framework”).

2 **DISCUSSION**

3 Samsung moves to enjoin Huawei from enforcing the injunctions issued in the Shenzhen
 4 Orders.¹⁰ As a preliminary matter, the parties dispute whether Samsung must establish the usual
 5 requirements for a preliminary injunction, in addition to satisfying the three-part *Gallo* test for an
 6 anti-suit injunction. Huawei’s Opp’n to Samsung’s Mot. to Enjoin Huawei from Enforcing the
 7 Injunction Issued by the Intermediate People’s Court of Shenzhen at 4, 13, 23 (“Opp’n”)(Dkt. No.
 8 277-4[redacted]; Dkt. No. 277-3[under seal]); Reply ISO Samsung’s Mot. for a Preliminary
 9 Antisuit Injunction at 2 (“Reply”)(Dkt. No. 277-3[under seal]; Dkt. No. 277-4[redacted]). As the
 10 district court noted in *Microsoft Corporation v. Motorola, Inc.*, “[u]nder a literal reading of *Gallo*,
 11 a showing of irreparable harm, balance of equities, and public interest might still be required to
 12 obtain an anti-suit injunction.” 871 F. Supp. 2d 1089, 1097 n.10 (W.D. Wash. 2012)(“*Microsoft*
 13 *I*”); *see Gallo*, 446 F.3d at 991 (“[Movant] need not meet the usual test of a likelihood of success
 14 on the merits of the underlying claim to obtain an anti-suit injunction Rather, [movant] need
 15 only demonstrate that the factors specific to an anti-suit injunction weigh in favor of granting the
 16 injunction.”).

17 The court went on to note two things—the absence of an analysis on the traditional *Winter*
 18 factors in *Applied Medical Distribution Corp. v. Surgical Co. BV*, 587 F.3d 909, 913 (9th Cir.
 19 2009), and the fact that the Third Circuit explicitly replaced all four *Winter* factors with the three-
 20 part *Gallo* test. *Microsoft I*, 871 F. Supp. 2d at 1097 n.10. It nonetheless analyzed the remaining
 21 *Winter* factors “[f]or completeness[.]” *Id.* But the Ninth Circuit, in affirming the district court’s
 22 grant of the foreign anti-suit injunction, focused only on the three-part *Gallo* test. *Microsoft II*,
 23 696 F.3d at 881. *But see id.* at 883–84 (“Ordinarily, we do not assess at all the likelihood of
 24 success on the merits in a case like this, because when a preliminary injunction is also a foreign
 25 anti-suit injunction, the likelihood-of-success aspect of the traditional preliminary injunction test is

26
 27 _____
 28 ¹⁰ As previously mentioned, Samsung references one order from the court, but it actually seeks to enjoin Huawei from enforcing two orders issued by the Shenzhen court on January 11, 2018. *See supra* note 9.

1 replaced by the *Gallo* test.”). The Ninth Circuit’s analysis convinces me that I need only focus on
2 the three-part inquiry under *Gallo*, and need not analyze the traditional *Winter* factors for
3 obtaining a preliminary injunction.

4 Because Samsung relies so heavily on that Ninth Circuit decision, *see* Mot. at 11–17, 19–
5 21, I will begin with a background of that case.

6 **I. MICROSOFT V. MOTOROLA**

7 The decision in *Microsoft v Motorola* addressed the parties’ obligations with respect to
8 patents they declared essential to the H.264 video coding standard set by the International
9 Telecommunications Union (“ITU”). *Microsoft II*, 696 F.3d at 875–876. The ITU’s Common
10 Patent Policy requires each member to “submit a declaration to the ITU stating whether it is
11 willing to ‘negotiate licenses with other parties on a non-discriminatory basis on reasonable terms
12 and conditions.’” *Id.* at 876. Motorola submitted numerous declarations to the ITU promising to
13 grant licenses to its SEPs on “reasonable and nondiscriminatory,” or “RAND” terms.¹¹ *Id.*

14 “In October 2010, Motorola sent Microsoft two letters offering to license certain of its
15 standard-essential patents.” 696 F.3d at 876. Motorola attached to the letter a “non-exhaustive
16 list” of its U.S. and foreign patents that it declared essential to the H.264 standard and included in
17 its license offer. *Id.* On November 9, Microsoft filed a breach of contract action against Motorola
18 based on the theory that it was a third-party beneficiary to Motorola’s RAND obligations, which it
19 alleged Motorola breached by proposing unreasonable royalty terms. *Id.* at 878. The next day,
20 Motorola filed a patent infringement suit, and the two cases were consolidated. *Id.* In February
21 2012, the district court granted partial summary judgment for Microsoft, concluding that (1)
22 Motorola had binding commitments to offer its declared SEPs on RAND terms, and (2) Microsoft
23 was a third-party beneficiary of those commitments. *Id.* The court denied summary judgment on
24 the two remaining issues of whether Motorola’s initial offer letter had to include RAND terms,
25 and whether its offers breached RAND obligations. *Id.* at 879. It scheduled those claims for a
26

27 ¹¹ “RAND” and “FRAND” are “legally equivalent abbreviations.” *Microsoft II*, 696 F.3d at 877
28 n.2.

1 bench trial in November 2012. *Id.*

2 Eight months after the domestic actions were filed, Motorola sued Microsoft in Germany
3 for infringement of two of its German patents, and it sought to enjoin Microsoft from selling
4 allegedly infringing products in Germany. 696 F.3d at 879. On May 2, 2012, the German court
5 issued its ruling,¹² holding that (1) Microsoft did not have a license to use Motorola’s patents, (2)
6 any commitment between Motorola and the ITU was not enforceable by Microsoft because
7 German law does not recognize third-party contractual rights, and (3) Microsoft infringed
8 Motorola’s German patents. *Id.* It enjoined Microsoft from “offering, marketing, using or
9 importing or possessing” the accused products in Germany. *Id.*

10 The “German injunction [was] not self-enforcing.” 696 F.3d at 879. Motorola had to
11 “post a security bond covering potential damages to Microsoft should the infringement ruling be
12 reversed on appeal[,]” then Microsoft could file a motion to stay the injunction in the German
13 appellate court. *Id.* Alternatively, Microsoft could avoid enforcement of the injunction by
14 employing “the *Orange Book* procedure,” under which it would make “an unconditional offer to
15 conclude a license agreement” with Motorola. *Id.*

16 On May 14, the district court converted the TRO, *see supra* note 12, into a preliminary
17 injunction. *Id.* at 880. The Ninth Circuit affirmed this decision. I will reference its reasoning as I
18 analyze each factor.

19 **II. APPLICATION OF THE GALLO TEST**

20 **A. The Parties and the Issues are the Same**

21 “The threshold consideration for a foreign anti-suit injunction is ‘whether or not the parties
22 and the issues are the same’ in both the domestic and foreign actions, ‘and whether or not the first
23 action is dispositive of the action to be enjoined.’” *Microsoft II*, 696 F.3d at 882 (quoting *Gallo*,
24 446 F.3d at 991). The consideration should be approached functionally, “not in a technical or
25 formal sense, but in the sense that all the issues in the foreign action ... can be resolved in the
26 local action.” *Id.* at 882–83 (internal quotation marks omitted). “[W]hen the parties in the two
27

28 ¹² By this time, Microsoft had already obtained a temporary restraining order (“TRO”) enjoining Motorola from enforcing any injunction obtained in the German action. 696 F.3d at 880.

1 actions are the same, the two questions of whether ‘the issues are the same’ and whether ‘the
2 domestic action is dispositive of the foreign action’ collapse into one.” *Microsoft I*, 871 F. Supp.
3 2d at 1098.

4 **1. The Parties Are Functionally the Same**

5 Both sides agree that the parties are functionally the same (although not identical). Mot. at
6 12; Opp’n at 16. Huawei Technologies Co., Ltd. and Samsung Electronics Co., Ltd. are parties to
7 both actions, and some of their affiliates or subsidiaries are parties in each action. Xie Decl. ¶ 3;
8 Since “[p]erfect identity of parties is not required for an anti-suit injunction[.]” *Microsoft I*, 871 F.
9 Supp. 2d at 1098, this is sufficient to establish that the parties are functionally the same.

10 **2. The Issues Are Functionally the Same**

11 Samsung insists that the primary issue in the Shenzhen cases is at issue here—namely, the
12 availability of injunctive relief for Huawei’s SEPs, which are subject to contractual licensing
13 obligations under Huawei’s FRAND commitments. *See* Mot. at 12–15. It argues that “[e]ach
14 party acknowledges it has contractual FRAND obligations for its global portfolio of
15 telecommunications SEPs, contends it has complied with those obligations and that the other party
16 has not, and has asked this Court to bar the other party from obtaining injunctive relief anywhere
17 in the world on those SEPs.” Mot. at 12; *see* Compl. ¶ 1 (“Huawei and Samsung have made
18 binding commitments to the European Telecommunications Standards Institute (“ETSI”)—a
19 3GPP organizational partner which promulgates standards developed by 3GPP—to license these
20 standard-essential patents (“SEPs”) on terms and conditions that are fair, reasonable, and non-
21 discriminatory (“FRAND”).)(Dkt. No. 59).

22 It urges that *Microsoft v. Motorola* is instructive because it “involved highly similar
23 facts[.]” *Id.* at 13. Motorola argued that the U.S. action could not resolve the German action
24 “because patent law is uniquely territorial and patents have no extraterritorial effect.” *Microsoft*
25 *II*, 696 F.3d at 883. The district court rejected this argument, and the Ninth Circuit agreed.
26 According to the district court, Microsoft’s contract claim would resolve Motorola’s German
27 patent claims “because the European Patents at issue in the German Action were included in
28 Motorola’s October 29 Letter offering a worldwide license for Motorola’s H.264 Standard-

1 essential patents, and because Motorola contracted with the ITU to license the European Patents
2 on RAND terms to all applicants on a worldwide basis.” *Id.* (quoting district court decision). It
3 determined that the district court’s decisions on summary judgment (that Motorola’s RAND
4 declarations to the ITU created a contract enforceable by Microsoft as a third-party beneficiary
5 and that the contract governed the availability of injunctive relief for declared SEPs) were not
6 “legally erroneous,”¹³ and therefore, it was not “an abuse of discretion for the district court to rule
7 that the U.S. contract action might dispose of the German patent action.” *Id.* at 884.

8 The Ninth Circuit cited Motorola’s “sweeping promise” in its declarations to the ITU,
9 which included “a guarantee that the patent-holder [would] not take steps to keep would-be users
10 from using the patented material, such as seeking an injunction, but [would] instead proffer
11 licenses consistent with the commitment made.” *Id.* at 884. The court summarized, “that there
12 [was] a contract, that it [was] enforceable by Microsoft, and that it encompass[e]d not just U.S.
13 patents but also the patents at issue in the German suit.” *Id.* at 885 (emphasis in original). It
14 concluded that irrespective of the district court’s ultimate determination as to whether Motorola
15 actually breached its contract, “injunctive relief against infringement is arguably a remedy
16 inconsistent with the licensing commitment.” *Id.*

17 As in *Microsoft v. Motorola*, Huawei alleges that Samsung breached its contractual
18 obligations under ETSI, Compl. ¶ 1, and seeks relief barring Samsung from obtaining injunctive
19 relief on its declared SEPs anywhere in the world. Samsung insists, therefore, that “this action
20 will necessarily resolve the fundamental issue presented in the Shenzhen injunction action,
21 namely, whether injunctive relief is appropriate for alleged infringement of SEPs that are subject
22 to contractual FRAND licensing obligations.” Mot. at 14. It also notes that there is no dispute
23 that the Chinese SEPs fall within the global portfolios of SEPs, Xie Decl. ¶ 3, and Huawei listed
24 those Chinese SEPs in the Letters of Assurance attached to its complaint, Huawei’s Licensing
25 Declarations (Compl., Exs. 2.1–2.43). And it emphasizes that the two Chinese SEPs are direct
26 counterparts of patents asserted here. Xie Decl. ¶¶ 4, 7.

27 _____
28 ¹³ It emphasized that it was not deciding whether the district court’s determinations were “proper”
because those issues were not before it on this interlocutory appeal. *Microsoft II*, 696 F.3d at 884.

1 But Huawei underscores critical factual distinctions here; namely, differences in the
2 positions of the parties and the decision of the foreign court. *See* Opp’n at 13–15. First, Microsoft
3 initiated the domestic action and asked the court to set the FRAND rate. *Microsoft I*, 871 F. Supp.
4 2d at 1099. In addition, it did not contest the essentiality or infringement of Motorola’s standard-
5 essential patents. *Microsoft Corp. v. Motorola, Inc.*, 2013 WL 2111217, at *59 (W.D. Wash. Apr.
6 25, 2013)(“*Microsoft III*”); *id.* at *61. So, Huawei contends, “Samsung’s attempt to cast itself in
7 the role of Microsoft ... is perverse.” Opp’n at 13. Samsung did not initiate this action, and it *is*
8 contesting the essentiality and infringement of Huawei’s declared SEPs. Second, Huawei
9 distinguishes its own conduct from Motorola’s. It notes that it filed this action and the Chinese
10 actions “at the same time,” not as “an end run around this action.” *Id.* at 14. This is unlike what
11 happened in *Microsoft*, where Motorola filed its German suit several months into the U.S. RAND
12 litigation, in a deliberate effort to force Microsoft to accept non-RAND terms. *See Microsoft IV*,
13 795 F.3d at 1046 (“The evidence that the rates Motorola sought were significantly higher than the
14 RAND rate found by the court suggested that Motorola sought to capture more than the value of
15 its patents by inducing holdup, and that it filed infringement actions to facilitate that strategy by
16 preventing Microsoft from using its patents—and therefore from implementing the 802.11 and
17 H.264 standards—until it obtained a license at a rate significantly higher than the RAND rate.”);
18 *id.* (“In the absence of a fear of irreparable harm as a motive for seeking an injunction, the jury
19 could have inferred that the real motivation was to induce Microsoft to agree to a license at a
20 higher-than-RAND rate.”). Third, it underscores the “critical distinction” that the German court
21 issued its injunction without evaluating whether Motorola had complied with its FRAND
22 commitment. *See Microsoft II*, 696 F.3d at 879. It contrasts that decision with the Shenzhen
23 Order, which explicitly considered and decided the underlying FRAND issues as a predicate to
24 determining whether Huawei was entitled to an injunction. In other words, the Shenzhen court
25 issued injunctive relief *because* it found that Samsung had not complied with its FRAND
26 obligations.¹⁴

27
28 ¹⁴ Huawei also argues that the Shenzhen Order should give rise to collateral estoppel effect when final. Opp’n at 15 (citing *Walia v. Aegis Center Point Devs. Private Ltd.*, 2014 WL 296003 at *2

1 But those undeniable and important differences are irrelevant to whether this action is
2 dispositive of the foreign action. Both parties have presented me with a breach of contract claim
3 based on the other’s alleged failure to abide by its commitments to ETSI.¹⁵ Neither party disputes
4 the other’s right to enforce that contract as a third-party beneficiary. And the availability of
5 injunctive relief for each party’s SEPs depends on the breach of contract claims. As in *Microsoft*,
6 “[t]he contractual umbrella over the patent claims” controls, *Microsoft II*, 696 F.3d at 883, and
7 dictates that this action is dispositive of Huawei’s Chinese actions. *See id.* (“In other words, the
8 party was ‘not seeking to enjoin [a party from litigating in] a foreign court on the basis of a patent
9 validity or infringement finding by a United States court’ but on the basis of a contract
10 interpretation by a U.S. court.”)(quoting *Medtronic, Inc. v. Catalyst Research Corp.*, 518 F.Supp.
11 946 (D. Minn. 1981), *aff’d*, 664 F.2d 660 (8th Cir. 1981)).

12 Samsung also points to Huawei’s prior requests that I address the FRAND issues first,
13 which, in Huawei’s estimation, “would moot patent infringement damages if Samsung is, in fact, a
14 willing licensee.” Huawei’s Br. ISO Bifurcation at 4–5 (Dkt. No. 84). By underscoring Huawei’s
15 prior position regarding bifurcation, Samsung seeks to highlight the dispositive nature of the
16 FRAND contract claims. But Samsung previously insisted that bifurcation was inappropriate
17 because I had to first determine whether each asserted patent was valid, enforceable, infringed,
18 and essential before I could decide an appropriate FRAND royalty rate. Since I only have the
19 power to decide those “prerequisite” issues for U.S. SEPs, under Samsung’s logic, I would not be

20
21 (N.D. Cal. Jan. 27, 2014) (“Collateral estoppel applies to foreign judgments so long as the parties
22 in the prior action were afforded due process rights.”); *see also U.S. v. Kashamu*, 656 F.3d 679,
683 (7th Cir. 2011) (“U.S. court[s] [] generally give preclusive effect to [a] foreign court’s finding
as a matter of comity.”)). I need not address that argument at this time.

23 ¹⁵ Huawei notes that Samsung has not “articulate[d] any likelihood of success on those [antitrust
24 and contractual FRAND] claims that could result in final relief enjoining Huawei from obtaining
25 an injunction elsewhere.” Opp’n at 17 n.15 (citing Mot. at 12–17). It is true that “a ballpark,
26 tentative assessment of the merits of the contract dispute is intrinsically bound up with the
27 threshold anti-suit injunction inquiry... .” *Microsoft II*, 696 F.3d at 884. But that does not mean
28 that Samsung must establish a likelihood of success on its claims. To the contrary, that inquiry is
replaced, in part, by the question of whether this contract action will dispose of the Chinese patent
actions. *See id.* Assuming I can decide the breach of contract claims, *see discussion infra*, this
action will dispose of those actions in either one of two scenarios—if Huawei’s breach of contract
claim is unsuccessful, or if Samsung’s breach of contract claim is successful. One way or the
other, this action will resolve the propriety of injunctive relief for the parties’ declared SEPs.

1 able to decide a FRAND rate for the parties’ global portfolios; rather, I would only have the ability
 2 to determine a FRAND rate for U.S. SEPs. Samsung has also argued that the court lacks the
 3 *authority* to set FRAND terms for any cross-license between the parties. *See* 9/6/16 Joint Case
 4 Management St. at 2 (“Samsung contends that Huawei, as yet, has not set forth a sufficient basis
 5 for its request for Declaratory Judgment of FRAND Terms and Conditions for a Cross-License,
 6 and Samsung reserves its rights to seek dismissal or other appropriate relief on any such claim,
 7 including on the basis of lack of subject matter jurisdiction.”); *id.* at 7 (“[T]he Court has no
 8 jurisdiction to ‘set’ FRAND terms for a general cross license.”)(Dkt. No. 67).¹⁶

9 Even beyond the question of whether I have the ability to determine a FRAND royalty rate
 10 (whether based on global or domestic SEPs), I am at a loss as to how I (or a jury) could decide the
 11 breach of contract claims. Unlike in *Microsoft*, the parties’ contract claims are based on whether
 12 their respective licensing offers were FRAND, not merely whether seeking “injunctive relief
 13 against infringement is arguably a remedy inconsistent with the licensing commitment.” 696 F.3d
 14 at 885. *See, e.g.*, Compl. ¶ 57 (describing how Samsung’s negotiation conduct breached its
 15 FRAND obligations); Answer and Am. Counterclaims ¶ 542 (“Huawei did not make an offer to
 16 license Huawei’s Patents-in-Suit on FRAND terms and conditions to Samsung before filing its
 17 Complaint for patent infringement and to date has not done so.”). How am I to adjudicate whether
 18 those offers were FRAND, if that determination depends on valuation of global portfolios, and can
 19 only be made subsequent to finding each patent valid and essential to the standard? *See, e.g.*,
 20 Reply at 9 (“As a result, no tribunal, here or elsewhere, will have ever critically examined
 21 Huawei’s licensing structure and determine what appropriate rates would be—let alone
 22 adjudicated issues of validity or infringement of the patents at issue, which is a predicate to a true
 23 FRAND analysis.”). If I take Samsung’s reasoning to its logical conclusion, I see no end to this
 24

25
 26 ¹⁶ In an added wrinkle, it was necessary to limit this case to a manageable scope. *See* Civil Pretrial
 27 Order (Dkt. No. 208). So I will not even be deciding those “prerequisite” issues for the parties’
 28 entire portfolios of U.S. SEPs. Assuming without deciding that I have the *authority* to set FRAND
 rates, accepting Samsung’s reasoning that each patent must first be evaluated would render me
 unable to decide a FRAND rate based on all of the parties’ U.S. SEPs.

1 case, and certainly no way for this action to dispose of the parties' foreign patent actions.¹⁷

2 Huawei urges me to reject Samsung's seemingly inconsistent positions because it "does
3 not merit exercise of [my] equitable power[.]" Opp'n at 16, and "[c]ourts derive the ability to enter
4 an anti-suit injunction from their equitable powers." *Gallo*, 446 F.3d at 989. It insists that judicial
5 estoppel dictates that "Samsung should be barred from now claiming entitlement to an anti-suit
6 injunction." Opp'n at 16; *see also id.* at 17 (citing *New Hampshire v. Maine*, 532 U.S. 742, 751
7 (2001), in which the Supreme Court recognized that "judicial estoppel forbids use of 'intentional
8 self-contradiction ... as a means of obtaining unfair advantage'"). This is tempting, given that
9 Samsung insists on its right to have its American patents litigated here but seeks to postpone the
10 impact of having Chinese patents litigated in China.

11 I conclude that estoppel need not bar Samsung from seeking this antisuit injunction. That
12 said, Samsung will not be able to argue that the breach of contract claims depend on evidence not
13 before me, such as the validity, infringement, and essentiality of foreign patents. Judicial estoppel
14 will apply to preclude such arguments. *See New Hampshire*, 532 U.S. at 749 ("[J]udicial
15 estoppel[] 'generally prevents a party from prevailing in one phase of a case on an argument and
16 then relying on a contradictory argument to prevail in another phase.'"). But I will not require
17 Samsung's "commitment or consent" that I "should decide the FRAND terms of a global patent
18 cross-license." *See* Opp'n at 17. The appropriate remedy for Huawei's breach of contract claim
19 may very well be the injunctive relief issued by the Shenzhen court. But I must have the
20 opportunity to adjudicate that claim without Samsung facing the threat of the Shenzhen court
21 injunctions.

22 **B. The *Unterweser* Factors**

23 Under the *Unterweser* factors, a court may enjoin foreign litigation "when it would (1)

24 _____
25 ¹⁷ In fact, Samsung attacks Huawei's characterization that the Shenzhen court truly considered
26 FRAND issues. *See* Reply at 2 ("[The Shenzhen proceedings] focused only on allegations of
27 Samsung's purported 'bad faith' negotiation positions without evaluating the size of or
28 justification for Huawei's proposed rates. [citation] Nowhere does the Shenzhen court address
whether Huawei's original 1.5% rate or variations thereon is FRAND or justified in any objective
way."); *id.* at 7 ("But the Chinese court did not determine the appropriate terms of a worldwide
FRAND license—it only made nebulous findings of conduct in the context of the Chinese patents
that it declared 'complied with FRAND principles' and then granted the injunction.").

1 frustrate a policy of the forum issuing the injunction; (2) be vexatious or oppressive; (3) threaten
 2 the issuing courts *in rem* or *quasi in rem* jurisdiction; or (4) where the proceedings prejudice other
 3 equitable considerations.” *Seattle Totems*, 652 F.2d at 855.

4 **1. Domestic Policy and Other Equitable Considerations**

5 Samsung argues that allowing Huawei to enforce the Shenzhen Court’s injunction would
 6 frustrate specific domestic policies against injunctive relief on SEPs and general public policies
 7 against anticompetitive conduct and breaches of contract. Mot. at 18. The bulk of precedent
 8 supports its position. *See, e.g., Microsoft II*, 696 F.3d at 884 (“Implicit in such a sweeping
 9 promise [made by Motorola to standards-setting organization] is, at least arguably, a guarantee
 10 that the patent-holder will not take steps to keep would-be users from using the patented material,
 11 such as seeking an injunction, but will instead proffer licenses consistent with the commitment
 12 made.”); *id.* at 885 (“[I]njunctive relief against infringement is arguably a remedy inconsistent
 13 with th[at] licensing commitment.”); *Realtek Semiconductor Corp. v. LSI Corp.*, Case No. C–12–
 14 03451–RMW, 946 F. Supp. 2d 998, 1006–07 (N.D. Cal. 2013)(“In promising to license on RAND
 15 terms, defendants here admit that monetary damages, namely a RAND royalty, would be adequate
 16 compensation for any injury it has suffered as a result of Realtek’s allegedly infringing conduct.”);
 17 *Apple, Inc. v. Motorola Mobility, Inc.*, No. 11-CV-178-BBC, 2012 WL 5416941, at *15 (W.D.
 18 Wis. Oct. 29, 2012)(“ I agree with Apple that from a policy and economic standpoint, it makes
 19 sense that in most situations owners of declared-essential patents that have made licensing
 20 commitments to standards-setting organizations should be precluded from obtaining an injunction
 21 or exclusionary order that would bar a company from practicing the patents.”)

22 But Huawei insists that there is no “per se rule that injunctions are unavailable for SEPs[.]”
 23 *Apple Inc. v. Motorola, Inc.*, 757 F.3d 1286, 1331 (Fed. Cir. 2014), *overruled on other grounds by*
 24 *Williamson v. Citrix Online, LLC*, 792 F.3d 1339 (Fed. Cir. 2015). It highlights precedent and
 25 policy that suggest “an injunction may be justified where an infringer unilaterally refuses a
 26 FRAND royalty or unreasonably delays negotiations to the same effect.” *Id.* at 1332 (citing U.S.
 27 Dep’t of Justice and U.S. Patent and Trademark Office, *Policy Statement on Remedies for*
 28 *Standard–Essential Patents Subject to Voluntary F/RAND Commitments*, at 7–8 (Jan. 8, 2013));

1 *see also* Makan Delrahim, Asst. Attorney General, Antitrust Division, U.S. Dept. of Justice,
2 Remarks as Prepared for Delivery at USC Gould School of Law – Application of Competition
3 Policy to Technology and IP Licensing: Taking It to the Limit: Respecting Innovation Incentives
4 in the Application of Antitrust Law (Nov. 10, 2017), available at
5 <https://www.justice.gov/opa/speech/file/1010746/download> (“A patent holder cannot violate the
6 antitrust laws by properly exercising the rights patents confer, such as seeking an injunction or
7 refusing to license such a patent.”)(Greenblatt Decl. ¶ 5, *id.*, Ex. 4, Dkt. No. 240-8).

8 That may be true, but the policy that is undermined is this court’s ability to determine the
9 propriety of injunctive relief in the first instance. *See, e.g., Zynga, Inc. v. Vostu USA, Inc.*, No. 11-
10 CV-02959-EJD, 2011 WL 3516164, at *3 (N.D. Cal. Aug. 11, 2011)(“But one clear policy that all
11 federal courts recognize—even those which have been loath to interfere with foreign
12 proceedings—is the need to protect the court’s own jurisdiction.”). There is a risk of inconsistent
13 judgments if I were to find that Huawei is not entitled to seek injunctive relief for its SEPs. *See*
14 *Microsoft I*, 871 F. Supp. 2d at 1100 (“Courts have found that court policies against avoiding
15 inconsistent judgments, forum shopping and engaging in duplicative and vexatious litigation
16 sufficient to satisfy this step.”). In addition, in the absence of an antisuit injunction, Samsung
17 faces the risk of significant harm, not just in China, but with impacts percolating around the world.
18 The Chinese injunctions would likely force it to accept Huawei’s licensing terms, before any court
19 has an opportunity to adjudicate the parties’ breach of contract claims.¹⁸ Under these
20 circumstances, the Shenzhen Order “interfere[s] with ‘equitable considerations’ by compromising
21 the court’s ability to reach a just result in the case before it free of external pressure on [Samsung]
22 to enter into a ‘holdup’ settlement before the litigation is complete.” *Microsoft II*, 696 F.3d at 886.
23 As in *Microsoft*, the Chinese actions “have frustrated this court’s ability to adjudicate issues
24 properly before it.” *Microsoft I*, 871 F. Supp. at 1100. The integrity of this action, therefore, will
25 be lessened without an anti-suit injunction. *See id.*

26
27
28 ¹⁸ Even though the Shenzhen court evaluated the parties’ licensing negotiations, it was not presented with breach of contract claims.

C. Vexatious or Oppressive

In *Microsoft II*, the Ninth Circuit concluded that the district court had not abused its discretion in finding that the timing and location of the foreign action “raise[d] concerns of forum shopping and duplicative and vexatious litigation.” *Microsoft II*, 696 F.3d at 886. Samsung highlights the same concerns here, and once again insists that the district court’s finding in *Microsoft* should control. Mot. at 19; see *Microsoft II*, 696 F.3d at 886 (finding Motorola’s proceedings in Germany to enforce its patents were “a procedural maneuver designed to harass Microsoft with the threat of an injunction removing its products from a significant European market and so to interfere with the court’s ability to decide the contractual questions already properly before it.”).

Huawei filed the Chinese actions at issue the day after it filed this one,¹⁹ so the same timing concerns present in *Microsoft* are not present here. See *Microsoft II*, 696 F.3d at 879 (noting that Motorola initiated the German patent litigation “several months into the ... domestic litigation”). But it did choose its home court for the majority of the Chinese actions, which implicates concerns of forum shopping. Huawei insists that the Chinese actions are neither duplicative nor vexatious because it committed to dismiss them if Samsung would consent to a court or arbitrator dictating the FRAND terms of a cross-license. But its own Vice President admitted that it uses injunctive relief “as a bargaining chip”:

19
20
21
22
23
24

Today, the number of disputes is on the rise, but we see fewer cases of injunction. Perhaps judges are quite reluctant to hear injunction cases because of its staggering impact on the market. Sure enough, the core issue is price; 90% or even 99% of the patent disputes are about price. Even if injunction order were to be enforced, does Huawei really want to kick Samsung out of China? Is it possible? Of course not. And is it possible for Apple to kick Samsung out of the US? No. That being said, when faced with potential licensees who are negotiating in bad faith, unwilling to pay fair royalties, you may want to file an injunction order with the court. At the end of the day, your purpose is to get the royalties in return, while using legal action as a bargaining chip. This is how things have changed over time.

25 Talk of Huawei’s Jianxin Ding S-816 Samsung China (Stake Decl. ¶ 2; *id.*, Ex. 1; Dkt. No. 235-7).

26 Huawei explains that this statement is consistent with its position that injunctive relief may be

27
28

¹⁹ Huawei phrases the timing as “simultaneously” because China is a day ahead of the United States. *E.g.*, Opp’n at 20.

1 appropriate when a party has refused to comply with its FRAND obligations. And it insists that it
 2 filed the Chinese actions because it “did not know (and still does not know) the scope of ultimate
 3 rulings from this Court on FRAND.” Opp’n at 20. Given the near simultaneity of the actions and
 4 the uncertainty over scope, I am unwilling to label the foreign suits “vexatious” or “oppressive.”
 5 *See Microsoft II*, 696 F.3d at 886 (explaining that “litigation may have some merit and still be
 6 ‘vexatious,’ which is defined as ‘without reasonable or probable cause or excuse; harassing;
 7 annoying.’ ”)(quoting *Black's Law Dictionary* 1701 (9th ed.2009)).

8 Since “at least one of the so-called ‘*Unteweser* factors’ applies,” I will proceed to assess
 9 whether the injunction’s impact on comity is tolerable. *Microsoft II*, 696 F.3d at 881.

10 **III. INJUNCTION’S IMPACT ON COMITY**

11 “Comity is ‘the recognition which one nation allows within its territory to the legislative,
 12 executive or judicial acts of another nation, having due regard both to international duty and
 13 convenience, and to the rights of its own citizens, or of other persons who are under the protection
 14 of its laws.’” *Gallo*, 446 F.3d at 994 (quoting *Hilton v. Guyot*, 159 U.S. 113, 164 (1895)). In
 15 *Gallo*, the Ninth Circuit excerpted a “detailed analysis of comity” by the D.C. Circuit in *Laker*
 16 *Airways Ltd. v. Sabena Belgian World Airlines*, 731 F.2d 909 (D.C. Cir. 1984). *Id.*

17 “Comity” summarizes in a brief word a complex and elusive
 18 concept—the degree of deference that a domestic forum must pay to
 19 the act of a foreign government not otherwise binding on the
 20 forum.... However, there are limitations to the application of comity.
 21 When the foreign act is inherently inconsistent with the policies
 22 underlying comity, domestic recognition could tend either to
 23 legitimize the aberration or to encourage retaliation, undercutting the
 realization of the goals served by comity. No nation is under an
 unremitting obligation to enforce foreign interests which are
 fundamentally prejudicial to those of the domestic forum. Thus,
 from the earliest times, authorities have recognized that the
 obligation of comity expires when the strong public policies of the
 forum are vitiated by the foreign act.

24 *Id.* at 995 (quoting *Laker Airways*, 731 F.2d at 937).

25 “*Gallo* requires not that we calculate the precise quantum of the injunction’s interference
 26 with comity, but only that we estimate whether any such interference is so great as to be
 27 intolerable.” *Microsoft II*, 696 F.3d at 886. In *Microsoft II*, the Ninth Circuit found that “comity
 28 is less likely to be threatened in the context of a private contractual dispute than in a dispute

1 implicating public international law or government litigants.” *Id.* at 887. The parties here find
 2 themselves “in the context of a private contractual dispute.” As in that case, “it does not raise any
 3 ‘public international issue.’” *Id.* at 888 (quoting *Gallo*, 446 F.3d at 994).

4 Samsung points out that the Shenzhen Order provides that “Huawei can agree after the
 5 appeal that the injunction will not be enforced, and further states that the Shenzhen Court would
 6 also permit non-enforcement if the parties agree to an SEP cross-license.” Shenzhen Order at 209;
 7 Xie Decl. ¶ 7. So the relief it seeks would have no impact on the Chinese courts; rather, it asks me
 8 to restrain Huawei from enforcing any injunction order until I have the opportunity to determine
 9 the propriety of injunctive relief for the parties’ SEPs. It specifically notes that Huawei would
 10 remain free to seek damages for infringement of its Chinese patents while this action is pending.

11 Courts may also consider “[t]he order in which the domestic and foreign suits were filed”
 12 in evaluating the impact on comity. *See Microsoft II*, 696 F.3d at 887. As discussed, Huawei filed
 13 the Chinese actions the day after it filed the complaint here.²⁰ Since this action preceded the
 14 Chinese actions—if only by one day—enjoining the foreign action would not “intolerably impact
 15 comity.” *Id.* The scope of the injunction further indicates that the impact on comity is tolerable.
 16 *See id.* Samsung seeks only to enjoin Huawei from enforcing the Chinese injunctions until I have
 17 an opportunity to evaluate the propriety of injunctive relief for the parties’ SEPs. Since Samsung
 18 has appealed the injunction order, the parties estimate a few months before it becomes final. We
 19 are scheduled to proceed to trial in December of this year. The scope of this anti-suit injunction,
 20 limited to a particular order dealing with two patents, a specific form of relief, and estimated to
 21 last less than six months, presents a negligible impact on comity. *See id.*

22 **IV. ADMINISTRATIVE MOTIONS**

23 The parties filed administrative motions to seal portions of their briefing and attachments.
 24 Dkt. Nos. 234, 240, 244. I ordered the parties to file supplemental declarations in support of
 25 sealing certain material. Order (Dkt. No. 270). They submitted those declarations and narrowly
 26 tailored their requests for sealing only that information that could cause them competitive harm.

27
 28

²⁰ As previously noted, Huawei insists that the actions were filed “simultaneously.”

Supp. Zhang Decl. ISO Huawei’s Admin. Mot. (Dkt. No. 277); Supp. Gray Decl. ISO Samsung’s Admin. Mot. (Dkt. No. 278). Because they have established compelling reasons for sealing their narrowly tailored requests, *Kamakana v. City & Cty. of Honolulu*, 447 F.3d 1172, 1178 (9th Cir. 2006), their administrative motions are GRANTED.

CONCLUSION

In accordance with the foregoing, Samsung’s motion to enjoin Huawei from enforcing the injunction orders issued by the Shenzhen court is GRANTED. Huawei should not seek to enforce those orders until I have the ability to determine the breach of contract claim it chose to present in this action prior to filing the Chinese actions.

IT IS SO ORDERED.

Dated: April 13, 2018

William H. Orrick
United States District Judge
